NMR data access at **imsercdata.northwestern.edu***:*

To view your group's archived data, you must complete the training at:
http://imserc.northwestern.edu/training/GettingStarted/index.html and agree to follow IMSERC's policies. It typically takes less than one week to activate an account.

For windows users:

At "Map network drive" dialog box, input **imsercdata.northwestern.edu**\share, use "ads.northwestern.edu\yournetid" as username and your NU password as passwd when promoted. "share" is your PI's last name, all lower case (see last paragraph for complete list).

For mac users:

 "Apple+k" to open "connect to server" dialog box, input smb:**//imsercdata.northwestern.edu**/share, the rest is same as windows.

All IMSERC data is organized into five subdirectories (ms, nmr, nmr_rt, xrd, others). "nmr_rt" is obsolete.

Available shares to map:

Everyone has access to: public, scratch
